ORACLE

Dears,

I am writing to express my interest in securing a position in Software development in your organization . I have bachelor's of degree in computer science and engineering from adama science and technology university with more than 5 years of experience in different companies as permanent employee and freelance contractual jobs that gave me so much experience and knowledge with different working environment . I come from a solid technical background with a strong interest in technology and a passion towards strategy , which is not only very analytical and technical by nature but also helps to build leadership and team building qualities. I believe my academic background and real world experiences have provided me with the credentials needed to thrive more.

Prior to ABC Company, I worked as a programmer, primarily developing as front end programmer. I gained solid research, analytical and problem solving skills while working in former companies. My background in generating innovative ideas and strategies to improve processes has provided me with a deeper understanding of multifaceted problems that companies encounter in their daily operations. Moreover, because of my work experiences, I fully understand how important it is to have great team dynamics in today's multi-disciplinary environment.

To date, my experience has been extremely rewarding, productive and help me "think out of the box" point of views.

I would appreciate to hear from you for any update . Please find enclosed my resume for your review. I can be reached via email at samsontsegay36@gmail.com or by phone at +251925473240. I enthusiastically look forward to hearing from you soon.

Thank you for your time and consideration.

Sincerely

**Samson tsegay**
